

Transfer Tray P 7020

Transfer Tray P 7020

This transfer tray with only one carriage is suitable for flush built-in into cash desks. A big advantage of this unit is its low installation depth. It is intended for indoor and roofed outdoor use, in case only documents and money are interchanged.

Security

P 7020 corresponds to the Accident Prevention Regulations of the German Administrative Professional Association BGV C9 (UVV-Kassen).

Operation

The unit is operated manually. The money carriage locks in both end positions and in mid position. Unlocking is possible by pushing the slide control.

Construction and finish

Robust steel construction with long-living and maintenance-free mechanics. Carriage made of impact-resistant plastic. Cover frame and carriage with abrasion-resistant structure lacquering (RAL 9005, Jet black).

Installation

The unit can be inserted from above into the prepared cut-out of the counter. The edges of the frame cover the cut-out. In order to build in the unit completely flush with the counter, the desk plate can be milled.

The unit has to be supported by e.g. consoles to make sure that the whole weight does not burden on the cover frame.

It should be also possible to dismantle the unit in case of later repairs and maintenance work will be necessary.

Intercommunication System

We recommend our Intercom System Delta to allow customer-friendly communication between operator and customer.

Scope of delivery (Item No.: 100596)

Transfer Tray P 7020 - Standard Jet black

Possible variants

P 7020/VA, with cover frame in stainless steel V2a (Item No.: 101379)
