

Transfer Tray P 7030

Transfer Tray P 7030

This model was designed for standing/sitting desks for indoor use and has one money carriage and below one fixed pass-through. At cashier side, the fixed pass-through is closed with a flap. The unit requires at customer side a standing desk, whereas at cashier side, the cashier can work on a combined sitting/standing desk. This model is mainly used in banks and other cash areas.

Security

P 7030 corresponds to the Accident Prevention Regulations of the German Administrative Professional Association BGV C9 (UVV-Kassen).

Operation

This unit is operated manually. The money carriage locks in both end positions and unlocks by pressing down the handle. In case the upper carriage is fully drawn into direction of cashier, the customer can deposit bigger objects. After the upper carriage is fully pushed to customer side, the cashier can open the flap and take off the object.

Construction and finish

Robust steel construction with long-living maintenance-free mechanics and with one steel carriage covered with stainless steel. The case has an abrasion-resistant structure lacquering (RAL 9005, Jet black).

Installation

The unit can be pushed from the inside (operator's side) into the prepared cut-out. The edges of the frame cover the cut-out. The unit has to be supported by e.g. consoles to make sure that the whole weight does not burden on the cover frame. It should be also possible to dismantle the unit in case of later repairs and maintenance work will be necessary.

Intercommunication System

We recommend our Intercom System Delta to allow customer-friendly communication between operator and customer.

Scope of delivery (Item No.: 100663)

Transfer Tray P 7030 - Standard Jet black, money carriage covered with stainless steel

Possible variants

P 7030, with case in special RAL-colour according to customer's request

Please contact us.
