

Transfer Tray P 7036

Transfer Tray P 7036

This unit was designed for flush mounting into cash desks of high-security areas. It is intended for indoor use in central banks, embassies, prisons and the army. The steel rail on top of the unit makes sure that the glazing above can be connected without slots and gaps.

Security

P 7036 is available in bulletproof classification FB4-NS and FB6-NS. Moreover the unit was tested according to DIN 52 290 in classification M5-SF which correlates to FB7-NS.

On request we send you the test certificate(s).

Operation

The unit is operated manually and locks in both end positions. It automatically unlocks when moving the tray by pushing or pulling the lever. The opening that respectively arises is closed by a counter-moving cover plate to prevent from unintended insertion of goods into the cabinet.

Construction and finish

Robust steel construction with long-living and maintenance-free mechanics. Cover frame and counter moving cover plate with abrasion-resistant structure lacquering (RAL 9005, Jet black).

Installation

The unit can be fitted into the prepared cut-out of the counter either from above or below and is solidly underpinned so the cover frame is flush with the counter. The surrounding gap has to be adequately sealed. In order to build in the unit completely flush with the counter, the desk plate can be milled.

In any case, the unit has to be supported by e.g. consoles to make sure that the whole weight does not burden on the cover frame.

It should be also possible to dismantle the unit in case of later repairs and maintenance work will be necessary.

Intercommunication system

We recommend our Intercom System Delta to allow customer-friendly communication between operator and customer.

Scope of delivery – execution standard black

P 7036 - FB4-NS (Item No.: 101962)

(lighter casing in FB4-NS)

P 7036 - FB6-NS (Item No.: 100769)

P 7036 - FB7*-NS (Item No.: 100777)

Possible variants

P 7036/VA - either in FB4, FB6 or FB7*

frame and counter moving cover plate in stainless steel V2a brushed

P 7036/EV1 - either in FB4, FB6 or FB7*

frame and counter moving cover plate in aluminium EV1 anodized

Possible are also combinations of the above mentioned units as well as units for thicker walls or with special dimensions, different colours and materials.
