

PASS-THROUGH P7040

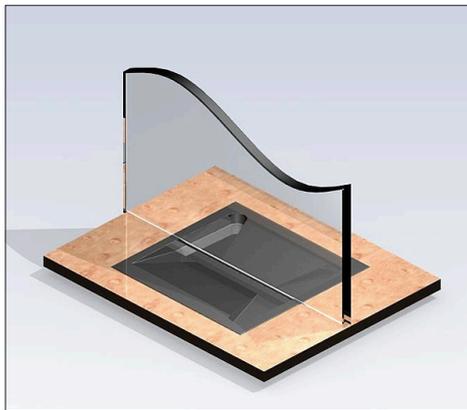

Product sheet

Compact pass-through for efficient transfer processes

This flat pass-through is designed for fast and secure payment handling. It's widely used at reception desks, security counters, banks, payment offices, and standard cashier stations.

With a pass-through height of 30 mm, it easily accommodates euro coin rolls. Ergonomically shaped grip recesses on both the customer and cashier sides ensure comfortable access to coins and loose change – for maximum convenience and efficiency in everyday operations.

Robust construction for professional use

The flat tray is made of durable, impact-resistant plastic and features a premium black textured coating that is extremely abrasion-resistant.

Its housing is constructed from galvanized sheet steel, ensuring maximum stability – ideal for daily use in demanding environments.

DESIGN AND SECURITY

Standard Features	Optional Equipment	Security
<ul style="list-style-type: none">• Sturdy steel construction• Durable and maintenance-free• Flat tray made of impact-resistant plastic, RAL 9005 deep black• Housing made of galvanized sheet steel abrasion-resistant, black textured paint finish (RAL 9005 deep black)	<ul style="list-style-type: none">• Delta 2.0 hands-free system for customer-friendly communication between customers and operators	<ul style="list-style-type: none">• Based on DGUV Regulation 25

INSTALLATION

The tray is inserted from above into the pre-cut countertop opening, with a surrounding edge neatly covering the cut surfaces. For flush mounting, the 1.5 mm thick trim edge can be recessed directly into the counter surface.

The pass-through must be supported from below by the customer.

The possibility of subsequent dismantling for maintenance or repair work must be ensured.
